

DVC PRESIDENT'S WELCOME

DVC is passionately committed to student learning through the intellectual, scientific, artistic, psychological, and ethical development of its diverse student body. DVC prepares students for transfer to four-year universities; provides career/technical education; supports the economic development of the region; offers pre-collegiate programs; and promotes personal growth and lifelong learning.

Judy E. Walters, Ph.D.

President, Diablo Valley College

Architecture

The DVC architecture technology program offers a certificate of achievement in architecture technology, which prepares its students for a career as an architectural technician.

As an architecture technology student, you will gain an in-depth understanding of the field of architecture and architectural design.

Students will take courses to learn about:

- graphics used in architecture
- architectural design
- preparation of architectural work drawings
- pencil and pen and ink sketching
- construction process
- materials of construction
- construction management
- mechanics and strength of materials
- elementary physics
- architectural history
- math
- surveying

To be competitive in today's market, employees must be highly trained, skilled and motivated. DVC's architecture courses incorporate the newest technologies, from the latest in CAD and animation software to modern digital equipment for surveying. Whether you are new to the architectural field or seeking to update your knowledge, at DVC you will gain the technical skills in demand by today's construction and architectural design industry.
