

Cynthia Anne McLean

Assignment:

Using any/all of the techniques explained in class, we were to make our "best" image.

We have been working to improve our photographic techniques and our abilities to post-process digital images. Paying careful attention to the mechanics of the photograph, the composition of the photograph, and the ways in which one can use software tools to enhance the photograph, we eventually submitted "our best photo."

Assignment:

This assignment was intended to push our abilities in Adobe Photoshop as well as our creativity. Combining photographs was meant to be challenging.

For this assignment, we were asked to show something beyond what we see everyday. We needed to go out and photograph common objects, both from far away and at the macro scale. Using those photographs, we combined two of them to create something out of the ordinary (a juxtaposition of scales, etc.)
